

Parker

Welcome to the AI Creative Strategy Blueprint II

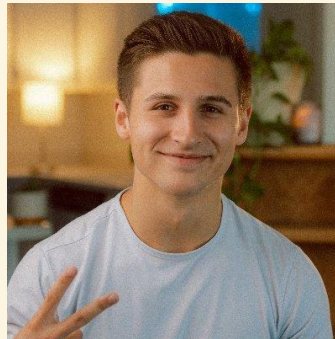

Alex and Jimmy

Alex Cooper

Co-founder, Parker +
AdCrate
Creative strategy + AI
systems

Jimmy Slagle

Co-founder, Parker
Creative operations + AI
systems

Together, we work at the intersection of AI and advertising.

Why This Course Exists

Claude Code and Codex are fundamentally changing how marketers work.

But there is very little content showing marketers how to use them.

A lot changed in one year.

2025

PROMPTING + CONTEXT
GUMLOOP + n8n
EARLY AI STATICS + AVATARS

Workflows

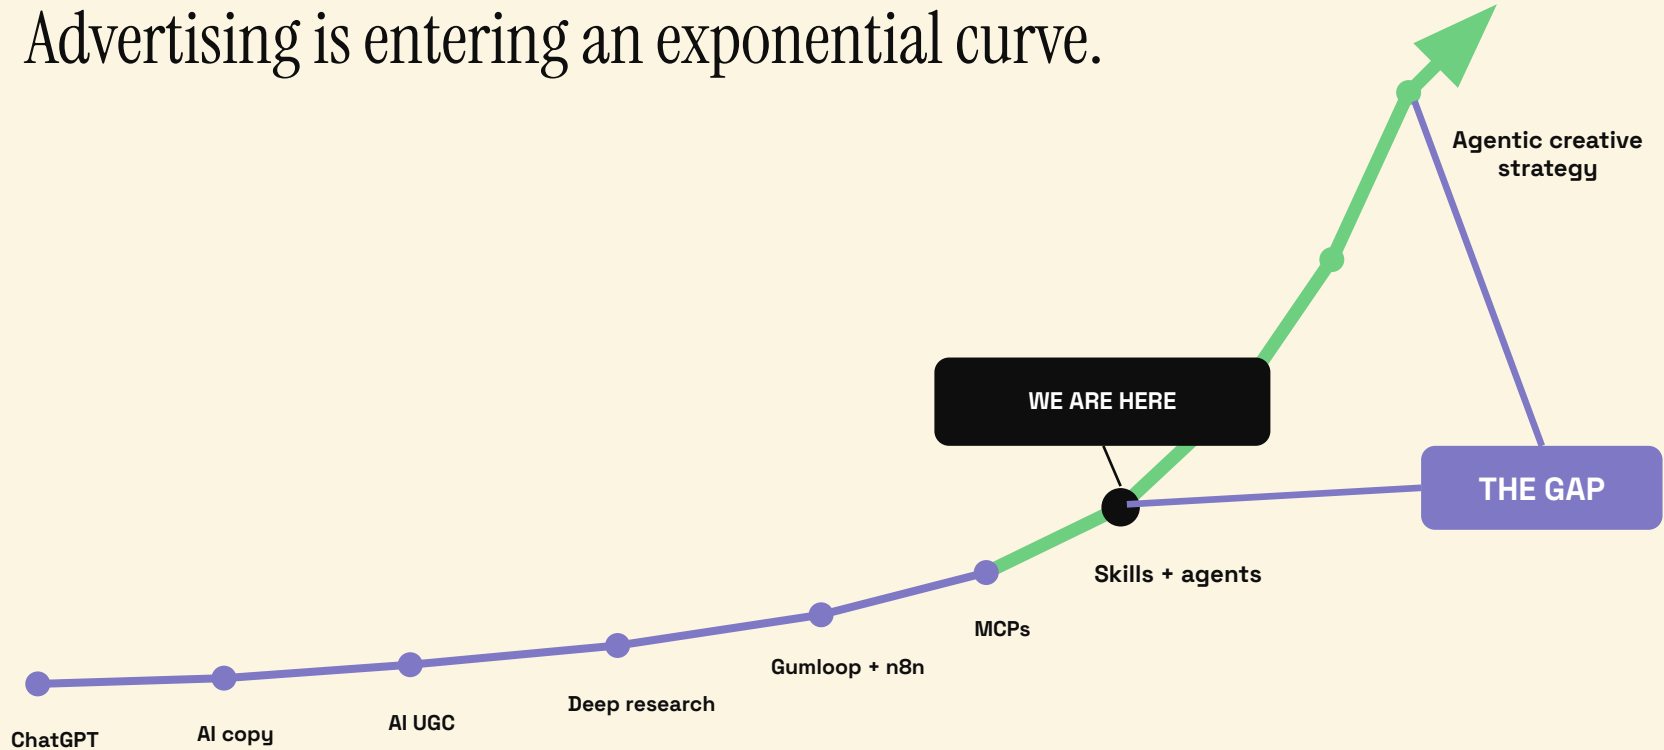

2026

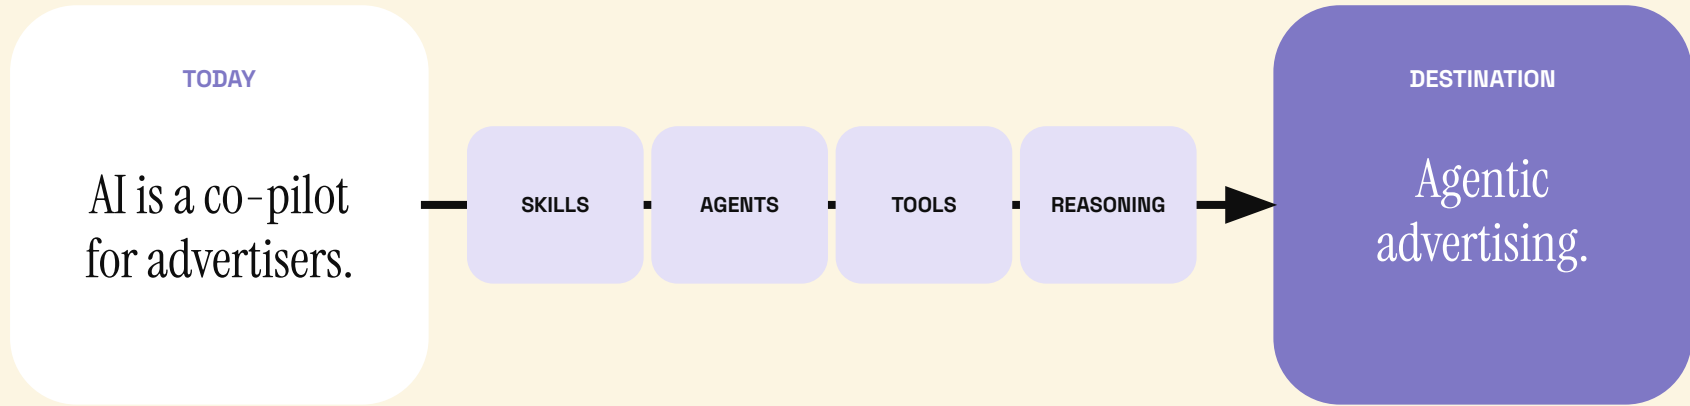

HARNESSES
CLAUDE CODE + CODEX
SKILLS + AGENTS

Systems

Advertising is entering an exponential curve.

So what closes this gap?

CREATIVE STRATEGISTS · MEDIA BUYERS · AGENCIES

BECOMING ENGINEERS

Let me show you what agentic
advertising looks like

By the end of this course, you will be an...

ENGINEER

CREATIVE STRATEGY

MEDIA BUYING

EDITING

GROWTH

The six-week blueprint

Learn the foundations. Then apply it.

LEARN THE FOUNDATIONS

01

CLAUDE CODE/CODEX 101

Harnesses, context, MCPs, and your first skill.

02

ADVANCED CLAUDE CODE + CODEX

Loops, goals, and parallel agents.

03

BUILDING A SHARED BRAIN

Living intelligence for your team.

APPLY IT

04

TURN INSIGHTS INTO ADS

Research, ideation, briefs, statics + animation.

05

SHIP, MEASURE + LEARN

Launch ads. Feed results back into research.

06

BUILD THE FULL SYSTEM

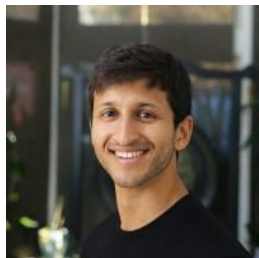

Put the entire creative operation together.

And some special guest speakers!

Grace Clarke

AI for normal
people

Maneesh Apte

Parker

Fundamentals of Claude Code and Codex

ChatGPT and Claude
are chatbots.

Claude Code and Codex
are harnesses.

The difference?

CHATBOTS

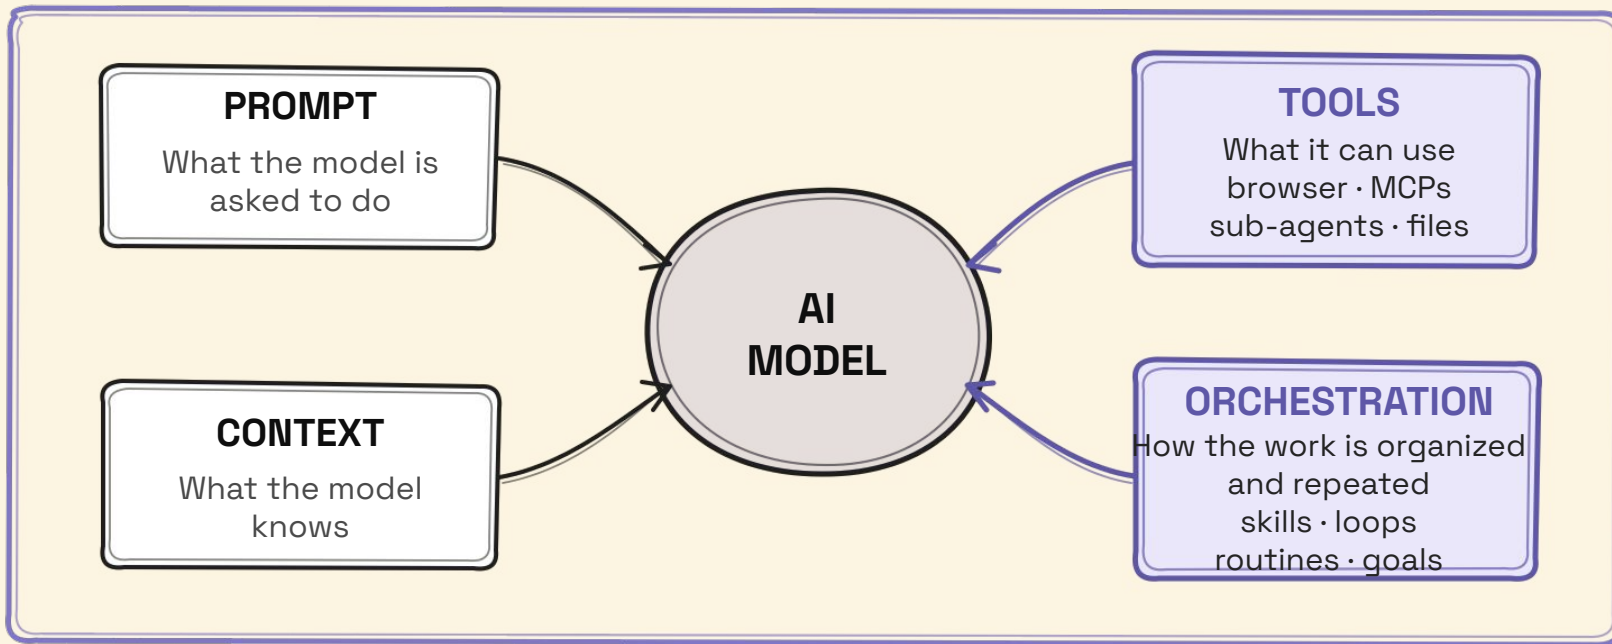

Focus on giving you a good output.

HARNESSES

Focus on doing the actual task for you with a set of tools.

What exactly is a harness?

HARNESS

Let's dive in to Claude Code!

Context Engineering

Context is just information. Like a Google Doc.

DOMAIN KNOWLEDGE

Industry expertise

TRIBAL KNOWLEDGE

Everything about your
company

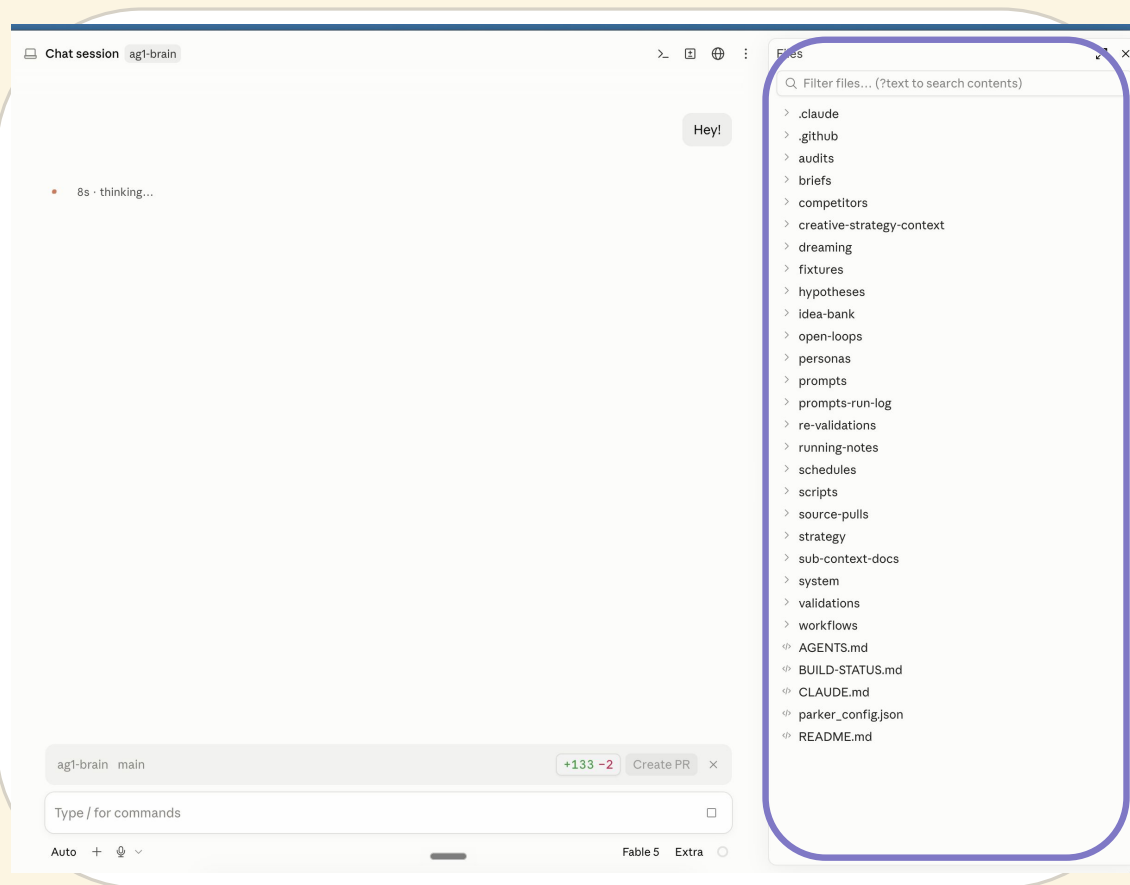

INTERPRETED DATA

An understanding of
where the company is
today

Context lives in the folders.

Claude Code and
Codex can browse the
workspace and pull in
what they need.

YOUR CONTEXT SYSTEM →

Our shared repository of
creative strategy knowledge.

OPEN CREATIVE STRATEGY CONTEXT ↗

02 TRIBAL CONTEXT

Everything a new employee needs to understand about your company.

PEOPLE

HOW WE WORK

SOFTWARE

EXPECTATIONS

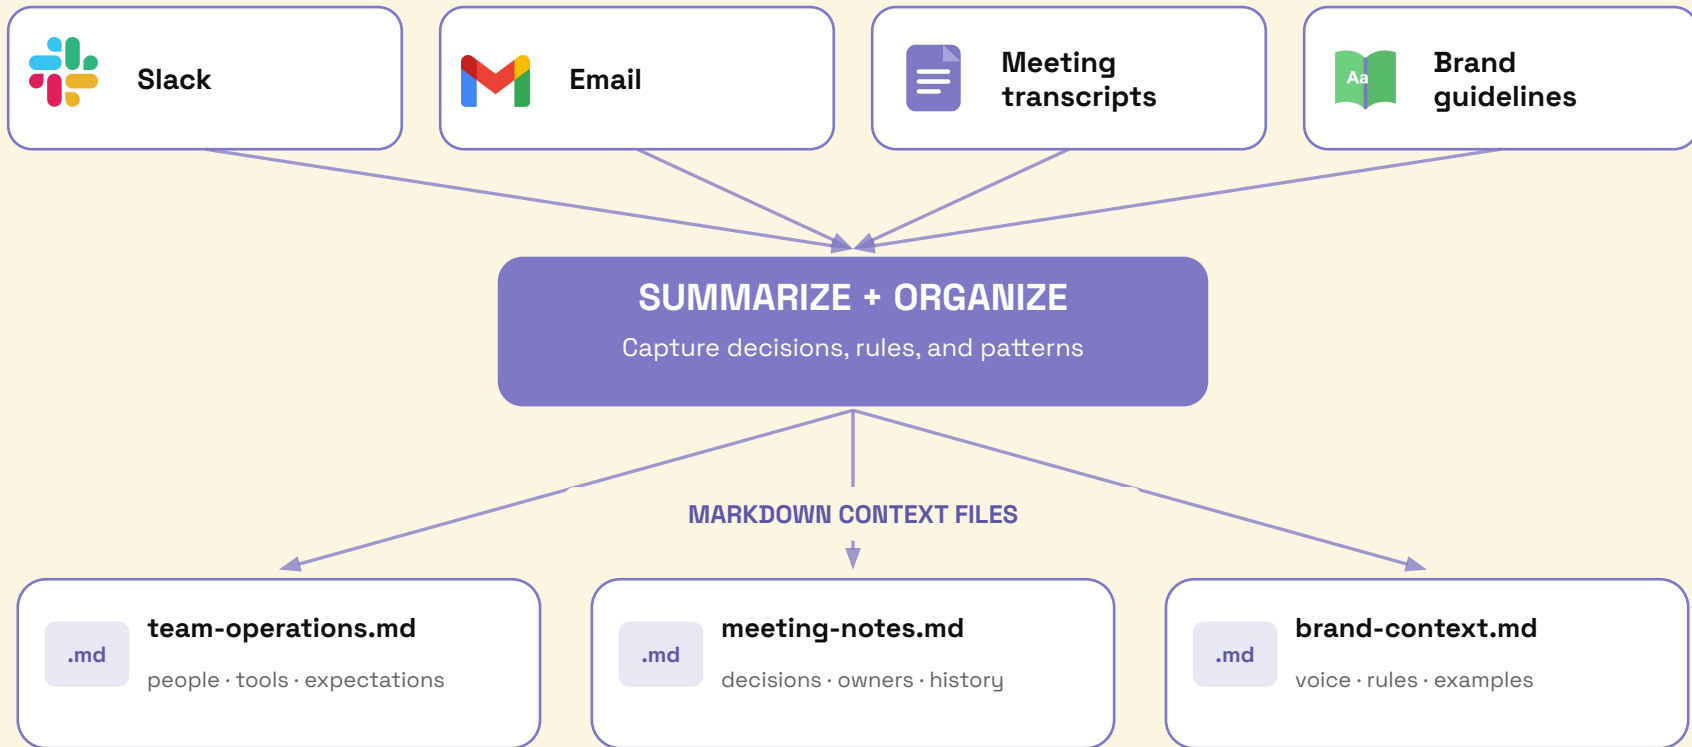

COMMUNICATION

GOALS

If a new hire needs it, your AI does too.

Turn tribal knowledge into context files.

RAW TRIBAL SOURCES

03 INTERPRETED DATA

The most up-to-date understanding of the data needed to make a decision.

RECENT PERFORMANCE

What's working now

CURRENT FINANCIALS

How healthy is our brand

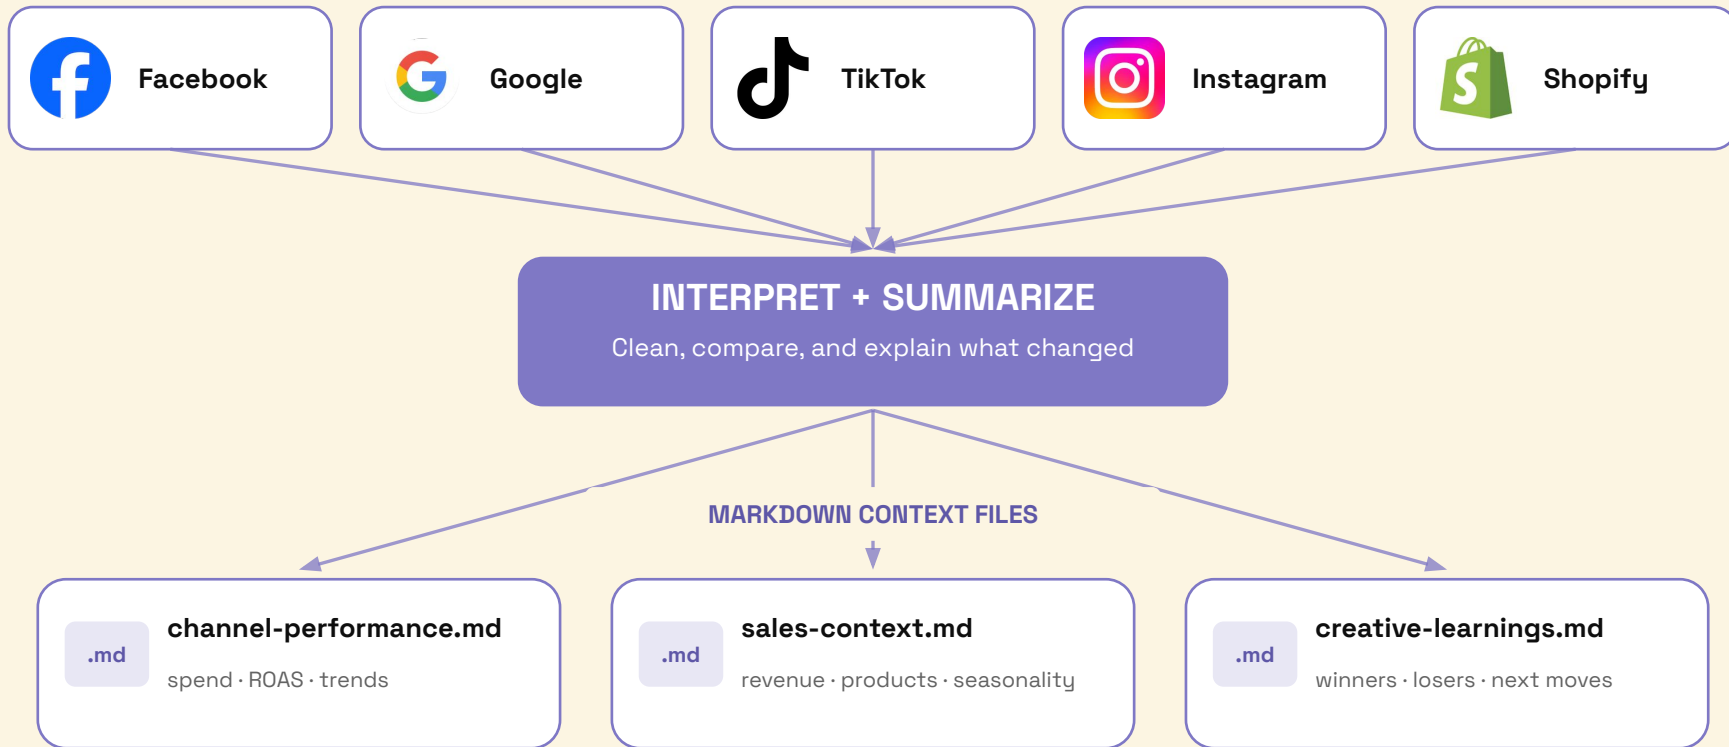

YEAR-OVER-YEAR TRENDS

What is changing over time

Good decisions require current data.

Turn raw data into interpreted context.

RAW DATA SOURCES

In summary, better context creates 10x better output.

DOMAIN KNOWLEDGE

How to do the work

BRAND KNOWLEDGE

How your company works

INTERPRETED DATA

What is happening now

SIGNIFICANTLY BETTER AI OUTPUT

More relevant · more accurate · more useful

But, context is rarely static.

It changes every day.

And that's the problem with Claude Projects/GPTs

	CLAUDE PROJECTS	CLAUDE CODE + CODEX
WHERE IT LIVES	Uploaded into a project	Inside your working folder
WHEN YOU ADD SOMETHING	You add it to one project knowledge base	AI files it in the right folder for you
HOW IT LOADS	Flat knowledge: Claude manages retrieval.	Working folder: AI opens only what it needs.

Projects store context. Harnesses navigate it.

Connectors + MCP

Give Claude Code and Codex live access to the tools your team already uses.

MCP is a standard way for AI models to use
outside tools and data

But connectors NEED interpretation

CONNECTED SYSTEMS

Let's connect the tools your team already uses.

We'll add Slack, Notion, and meeting transcripts—then use them to update the right context files.

LIVE CONNECT

YOUR
SYSTEMS

Slack
Notion
Meeting
transcripts

Context files

Connect the source. Explain
the workflow. Let Claude
update what matters.

Using the Parker MCP

- Ad account data
- Ad library of 3M ads, all AI tagged and sorted by impressions
- Customer reviews
- Post-purchase surveys
- Ad comments
- Reddit
- TikTok
