

Welcome back!

AI Creative Strategist Blueprint II
Week 3 • A shared living brain

Reminder:
Everything
lives here.

Recordings • slides
prompts • resources

AI Creative Strategist Blueprint II — Course Home

Welcome to AI Creative Strategist Blueprint II.

If you are very new to Claude Code, Codex, GitHub, MCPs, and more, make sure to start with Week 0! If you already use these tools, you probably do not need to watch or attend week 0.

We will be filling out the rest of the weeks after they happen. **Everything will be recorded** so you can view them later

If you need any help, please email us at support@realsimplelabs.com.

We're so excited for this!! :)

FYI. you're already in the running for **\$5,000 in AI credits** to Anthropic or Open AI. We'll announce the winner at the start of the first live session.

Course weeks

- 0 Week 0 — Start Here
- 1 Week 1 — August 27th
- 2 Week 2 — September 3rd
- 3 Week 3 — September 10th
- 4 Week 4 — September 17th
- 5 Week 5 — September 24th

Course Sessions

Thursdays · 12pm Eastern · Today: September 10

BUILD THE FOUNDATION

- 01 **AUG 27**
CLAUDE CODE / CODEX 101
Learn the tools and how to use them.
- 02 **SEP 3**
SKILLS + ROUTINES
Build repeatable ways of working.
- 03 **TODAY · THU, SEP 10**
BUILD YOUR BRAIN
Bring everything together.

APPLY IT

- 04 **SEP 17**
TURN INSIGHTS INTO ADS
Research + ideation + briefing.
- 05 **SEP 24**
SHIP, MEASURE + LEARN
Creators, campaigns + feedback loops.
- 06 **OCT 1**
BUILD THE FULL SYSTEM
Creative ops, end to end.

Our guest sessions

TUESDAYS • 12PM EASTERN

Grace Clarke

SEP 8
**AI for Normal
People**

Jacob Posel

SEP 15
Shared team AI + HQ

Maneesh Apte

SEP 22
**Building a Hermes
agent**

Andrei Lunev

SEP 29
**AI static ad
systems**

Ali Qureshi

OCT 6
**Agency operating
systems**

Recap

Week 1: Context engineering

**DOMAIN
EXPERTISE**

+

**TRIBAL
KNOWLEDGE**

+

**INTERPRETED
DATA**

HOW TO DO THE WORK

HOW OUR COMPANY
WORKS

WHAT THE DATA MEANS
FOR US

Give AI the right context for the work.

The context becomes Markdown files

The screenshot shows a Google Docs document titled "A Simple Markdown Context File — Week 3 Example". The document content is as follows:

A simple context file

This fictional example shows the plain text you could save as brand-overview.md. The # symbols mark headings; the dashes mark list items. We're viewing it in Google Docs for the demo.

Trailside Coffee — Brand Overview

What we sell

We sell coffee beans online for people who want a better cup at home without making coffee a hobby.

Who we serve

Busy people who want good coffee and straightforward advice. Our audience is a starting assumption to check against customer research.

Why people might choose us

- Easy-to-understand roast options.
- Simple brewing instructions.
- Flexible subscriptions.

How we sound

Warm, clear, and practical. Explain coffee in simple language. Avoid jargon and exaggerated promises.

Week 1: Context docs live in folders

The screenshot displays the Claude Code interface. On the left, a chat window titled "Chat session" shows a conversation with the user "hey". The assistant responds with a greeting and offers to help with script work, account reads, competitor analysis, or brainstorming. It also mentions a "housekeeping" task of setting up routines. A "Claude Code notice" is visible below the chat. At the bottom of the chat is a text input field with the placeholder "Type / for commands" and a microphone icon.

In the center, a file explorer sidebar is open for the file "Brand overview.md". It shows a hierarchical structure of folders and files:

- 00 Brand
 - Brand overview.md
- 01 Creative Strategy
 - Audits
 - Ideas
 - Learning
 - Methods
- Routines
 - Context updates.md
 - Dreaming.md
 - Schedule register.md
 - Self-improvement.md
- Sources
- Strategy
- 02 Media Buying
- 03 Growth Marketing
- 04 Email
- 05 SMS

On the right, the content of "Brand overview.md" is displayed. It features a title "Brand overview: Parker AI" and a status note: "Status: Draft for review. Generated September 5, 2026. Review by October 5, 2026. Source: Parker MCP brand context and the saved course-ad evidence. The supplied brand context is undated." Below this is a section titled "What the company does" which describes Parker's creative strategy platform. The text at the bottom of the document is partially cut off.

Week 1: Connect your data with MCPs

Week 2: What is a skill?

A skill is a reusable playbook
that teaches AI how you want
a task done.

What makes up a simple skill?

TITLE

The name of the
skill

DESCRIPTION

2–3 sentence
overview
of what it does

INSTRUCTIONS

How to execute
the task

The instructions often tell AI to read context docs
and pull data through MCPs.

WEEK 3 • THURSDAY, SEPTEMBER 10

Build a shared living brain.

Put context, skills, MCPs, and routines together.

WEEK
03

Example of a brain

What do we mean by “brain”?

The hub for your context docs,
skills, and MCPs and the system
that keeps it all up to date.

The brain starts with a guide

Claude Code → CLAUDE.md

Codex → AGENTS.md

Loaded at the start of your session.
Tells AI how to work inside this brain.

What goes in CLAUDE.md / AGENTS.md?

What this brain is for.

Where to find context.

When to act and when to ask.

Where finished work belongs.

Keep it short. Link to deeper context and skills.

Give AI room to choose how to do the work.

Today I'll show you how to build
a creative strategy brain.

Next: A brain for the whole company

Jacob will show you how to build
a more general company brain.

Tuesday, September 15 · 12pm ET

How to Create a Brain

- 01 Create the folder scaffolding
- 02 Create document placeholders
- 03 Add your domain context
- 04 Connect your data + tools
- 05 Debrief AI on your creative strategy for 30 minutes
- 06 Create prompts to generate each doc
- 07 Create routines to keep context relevant
- 08 Create skills to do the work
- 09 Create CLAUDE.md / AGENTS.md
- 10 Make it multiplayer: GitHub, HQ, or Parker
